

Void Protective Seal Authentication

U.S. notary is done using staplers and some Chinese government agency does not recognize that. We offer void protective seal where we will put your document in a void protective envelope. Once someone opens the envelope, the seal will be broken. We can also put void tamper tape to seal your document.

Notary documents come with only a staple

We can put the document in an envelope and seal it with void tamper. This service starts at \$5 per seal envelope.
